I just finished a couple of crops of this strain from Dutch Passion. Its a very sweet smoking (lots
like Skunk1

but sweeter) and if you get a good mother it can be pretty potent. Out of ten seeds had 1 male, 4
hermies and

5 females with one keeper (makes me wonder about the breeding). Its pretty rough on the lungs
but I enjoy it

if I have to keep moving while stoned. It is a very clear energetic high. Fairly low yield. I wouldn't
recommend it

very highly (I like more body in the high) although I enjoy smoking it. - Stix
